**Re: EnviroSAFE Services of Ohio, Inc.  
Oregon, Lucas County, Ohio  
EPA Identification Number: OHD 045 243 706; Ohio Permit Number: 03-48-0092  
January 2011 Progress Report**

Dear Ms. Ackerson:

In accordance with Condition E.13 of its Ohio Hazardous Waste Facility Installation and Operation Permit (the "Permit"), EnviroSAFE Services of Ohio, Inc. ("ESOI") hereby submits this progress report to the Ohio Environmental Protection Agency ("Ohio EPA") for the period beginning January 1, 2011 and ending January 31, 2011.

### **Corrective Measures Study ("CMS"):**

#### **Project Activities and Summary of Findings to Date:**

During this reporting period, CMS activities included the following:

1. Finalization and submission of the CMS Report on January 7, 2011.

#### **Summary of All CMS-Related Contacts with the Public:**

ESOI has not had any related contacts with the public during this reporting period.

#### **Summary of Potential or Encountered Problems and Rectification Actions:**

There is nothing to report in association with this topic for this reporting period.

#### **Changes in Personnel:**

There have been no changes to CMS personnel during this reporting period.

#### **Projected Work:**

During the next reporting period it is anticipated that the following activities will occur:

1. Response to any Ohio EPA questions regarding CMS Report.
2. Public Notice regarding addition of Corrective Action information to ESOI website.

3. In January, ESOI attempted to remove the pump equipment from RW-6 and RW-7 to convert the dry wells to piezometers. It was found that the well casings have shifted making manual removal difficult. The tops were removed to allow for level measuring equipment to be inserted. Liquid was found in the wells that were once dry. A second attempt to remove the equipment will be made in February using mechanical means. A sump pump will then be utilized to remove the accumulated water and the wells will be monitored for recharge. If significant recharge is found, the wells will be reestablished as recovery wells;
4. An update of the Explosive Gas Monitoring Plan to include the newly installed passive vent on SWMU 6 was submitted to DSIWM on January 27, 2011; and
5. Continued operation and monitoring of the leachate extraction systems on SWMUs 5, 6, and 7.

**Summary of All CMI-Related Contacts with the Public:**

ESOI has not had any related contacts with the public during this reporting period.

**Summary of Potential or Encountered Problems and Rectification Actions:**

See the November 2010 progress report for issues previously reported regarding recovery well RW-4. There is nothing new to report in association with this topic for this reporting period.

**Projected Work:**

During the next reporting period it is anticipated that the following activities will occur:

1. Continued operation and maintenance of the leachate extraction systems on SWMUs 5, 6, and 7.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

If you have any questions, please do not hesitate to contact Stephen DeLussa at (215) 659-2001 ext. 15.

Sincerely,  
  
Douglas E. Roberts  
President
